Installation Guide and License Conditions
Korg modwave Ocean Sound Pack

Before transferring sound sets to your synth, please backup your patches first!
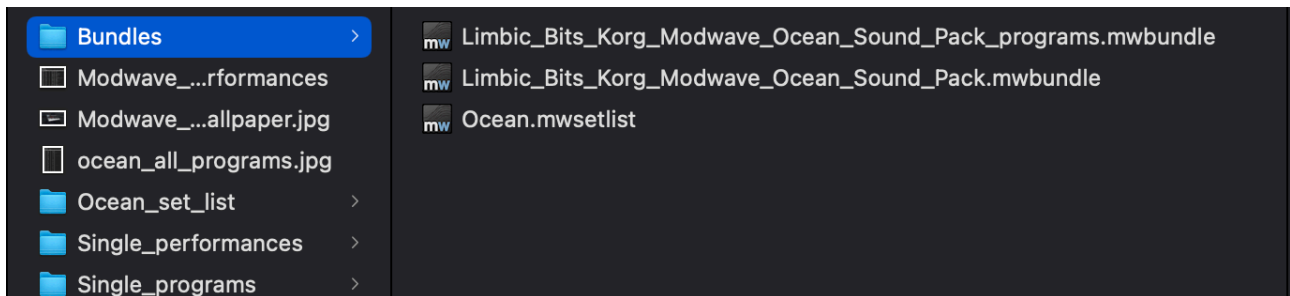

All Sound Banks are in the corresponding editor's format (if available). Please refer on the manual provided by the product's manufacturer. Whenever applicable, you can alternatively use the included SysEx-File.
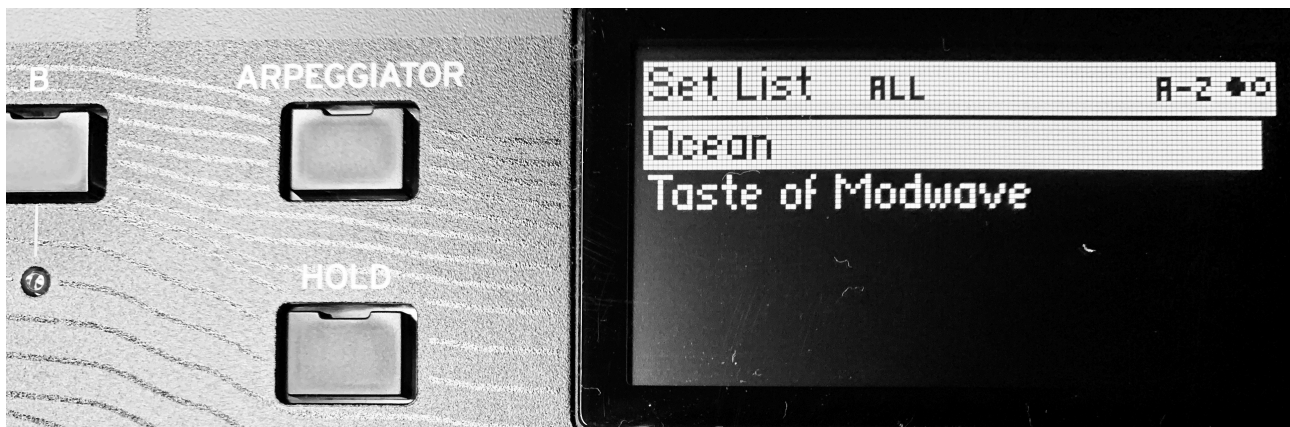

To load the Ocean Sound Pack into your unit:

1. Make sure you're using the latest OS and librarian software. You can find them here: https://www.korg.com/us/support/download/product/0/880/
2. Switch on the synth and wait until it's ready
3. Open the modwave editor librarian software and wait until a connection has been established.
4. Navigate to the downloaded folder „Limbic_Bits_Korg_Modwave_Ocean_Sound_Pack".
5. If you like to install the whole sound pack - which I'd highly recommend - please navigate to the included folder „bundles". (*In case you prefer to*

select individual programs or performances you can find these in the folders „single performances" and „single programs".)

6. Drag and drop all three files from the „bundle folder" into the librarian window and confirm.

7. To easily walk through the 50 performances, please follow the next step: On the modwave hardware, choose the Ocean set list which contains all 50 performances in Banks A-D. You can find the set list in the system setup by clicking the „utility-"button once.

8. That's it: Now, make some great music.
