## Sequential Take 5 Mountains Sound Pack

Before transferring sound sets to your synth, please backup your patches first! All 64 presets will be stored in user banks 1-4.

In order to transfer this Sequential Take 5 sound pack, you'll need a computer, a stable USB or MIDI connection (USB would be easier) and a SysEx librarian.

You can use a MIDI librarian application such as „SysEx Librarian“

for Macintosh, or „MIDI-OX" for Windows to transmit programs or banks into your Take 5.

1. Connect your synthesizer to a computer using a USB cable (or MIDI cable, if you are using a dedicated MIDI interface).
2. Press the global button on the Take 5.
3. Use the select knob to select midi sysex cable, then use the value knob to choose usb or midi, depending on which port you are using to connect to your computer.
4. Open your Sysex librarian software and configure it to send SysEx messages to your Take 5.

PLEASE NOTE! The next step will replace any existing programs in those same memory locations on the synth so be sure to make a backup first.

5. In the SysEx librarian, open the files you want to send. In case you'd like to only send parts of the mountains sound pack, you'll find Pads in Bank1, Basses in Bank2, Leads and Arpeggiator sounds in Bank 3, and more pads, leads, fx-sounds and dub chords in Bank4.

6. Transmit the programs. The Take 5 should load them into the first 64 user presets.

## **Trouble Shooting**

In case something went wrong, please

- use a direct USB connection instead of a USB HUB
- try a different USB cable
