Installation guide: dreadbox Nymphes Pantheon Sound Pack

In order to transfer this sound pack, you'll need a computer, a stable USB or MIDI connection (USB would be easier), and a SysEx librarian. You can use a MIDI librarian application such as „SysEx Librarian" for Macintosh, or „MIDI-OX" for Windows to transmit programs or banks into your Nymphes.

1. Connect your Nymphes to a computer using a USB cable (or MIDI cable, if you are using a dedicated MIDI interface).
2. Open your Sysex librarian software and configure it to send SysEx messages to your Nymphes (aka select Nymphes USB as port)
3. PLEASE NOTE! The next step will replace any existing programs in those same memory locations on the synth so be sure to make a backup first. (as explained in the Nymphes manual)
4. In the SysEx librarian,select the unzipped file "Dreadbox_NymphesPantheon_Sound_Pack_Limbic_Bits.syx" .
5. Transmit the programs. Nymphes should load them into the 49 user presets.

Trouble Shooting

In case something went wrong, please try these things:
1. Use a direct USB connection instead of a USB HUB
2. Try a different USB cable
3. Make sure you have the latest Nymphes firmware version
