

# PRO-800 MODUS

## Installation guide:

### Behringer PRO-800 Modus Sound Pack

Before transferring sound sets to your synths, please backup your patches first!

In order to transfer this Behringer Pro-800 sound pack, you'll need a computer, a stable USB or MIDI connection and a SysEx librarian of your choice. You can use a MIDI librarian application such as 'SysEx Librarian' for Macintosh, or 'MIDI-OX' for Windows.

1. Connect your PRO-800 to a computer using a USB cable (or MIDI cable, if you are using a dedicated MIDI interface).
2. The sound pack is available in four different versions. The presets are the same but you can choose the bank to which this sound pack will be transferred (Bank A,B,C, or D)
3. Open your Sysex librarian software and load the sysex file (e.g. "Limbic\_Bits\_PRO-800\_Modus\_Bank\_D.syx").
4. Now, configure your SysEx librarian to send SysEx by selecting the PRO-800's USB connection (or your MIDI interface) PLEASE NOTE! The next step will replace any existing programs in those same memory locations on the synth so be sure to make a backup first.
5. Transmit the programs. The PRO-800 needs a moment to store the presets in its internal storage. Don't switch off the unit during that process.
- 6.

## Trouble Shooting

In case something went wrong, please

- use a direct USB connection instead of a USB HUB

- try a different USB cable
- try to use a 5-pin-MIDI interface instead of USB
