Installation guide:

Oberheim TEO-5 Sound Pack

Before transferring sound sets to your synth, please back up your patches first! All 64 presets will be stored in user banks 1-4 and will replace the sounds in these locations.

To transfer this Oberheim TEO-5 sound pack, you'll need a computer, a stable USB or MIDI connection (USB is easier), and a SysEx librarian. You can use a MIDI librarian application such as "SysEx Librarian" for Macintosh or "MIDI-OX" for Windows to transmit sound banks to your Oberheim TEO-5.

1. Connect your TEO-5 synth to a computer using a USB cable (or MIDI cable if you are using a dedicated MIDI interface).
2. Open your SysEx librarian software and configure it to send SysEx messages to your Oberheim TEO-5 by selecting the chosen MIDI connection (e.g., Oberheim TEO-5 USB).
   PLEASE NOTE! The next step will replace any existing programs in those same memory locations on the synth, so be sure to make a backup first.
3. In the SysEx librarian, open the files you want to send. If you'd like to send only parts of the Cranium sound pack, you'll find Pads in Bank 1, Basses and Arpeggios in Banks 2 and 3, and more pads, leads, FX sounds, and dub chords in Bank 4.
4. Transmit the programs. The Oberheim TEO-5 should load them into the first 64 user presets.

Trouble Shooting

In case something went wrong, please

• use a direct USB connection instead of a USB HUB

• try a different USB cable
